ance Notes on Codes and Abbreviations" appearing at the begin-
ning of each regular issue of the PCT Gazette.

(52) Title: BIOMARKERS IN CANCER

(57) Abstract: Biomarkers may be used in the treatment of cancer, and as an aid in clinical decision making regarding which anti-
cancer therapy to use in a particular patient. Described herein are methods of assessing whether a subject with a solid tumor is
suitable for treatment with a dual EGFR/erbB2 tyrosine kinase inhibitor, by assessing the relative localization of pERK or pAKT in
tumor cells, and/or assessing pre-treatment tumor cell levels of ErbB2.
